# Index of Subjects

**Adenosine 5′-triphosphate,** in milk, 91
**Amides,** added, heat stability, milk, 211

**Blood,** plasma, constituents, parturient cows, 1α-hydroxycholecalciferol, injected, 177
**Buffalo,** β-casein, rennin, action, 421

**Camel,** milk, quality, effect of drought, 159
**Casein(s),** composition, milk, Friesian cows, 71
  rats, 97
  distribution, cell count, milk, cheese-making parameters, 393
  stored milk, cheese-making parameters, 371, 383
  hydrophobic surface areas, 123
  lysinoalanine produced from, 193
  micelles, coagulation, rennet, effect of structure of additives 359
  dilution, stability, 343
  glycosylated κ-casein, localization, 185
  heat-induced association, β-lactoglobulin, 313
**$\alpha_{s1}$-Casein,** $Ca^{2+}$, binding to, complexes, precipitability, 113
**β-Casein,** buffalo, rennin, action, 421
**κ-Casein,** glycosylated, localization, casein micelle, 185
  hydrolysis, rennet, 351
**Cell count,** milk, casein distribution, cheese-making parameters, 393
  types, dry cow secretions, colostrum, milk, 39
**Cell volume,** distribution, mastitis, diagnosis, 167
**Cheesemaking,** casein distribution, cell count, milk, influence, 393
  stored milk, influence, 371, 383
**Chloroform,** introduced into rumen, milk-composition, -yield, goats, 51
**Chymosin,** *see* **Rennin**
**Coagulation,** milk proteins, heated, amides, effect of, 211
  concentrated skim-milk, 327
  milk dialysate, factors, 337
  skim-milk, effect of pH, temperature, forewarming treatments, 199
**Colostrum,** cell types, electron microscopy, 39
**Cream,** ripening, lactic acid bacteria, quality, ghee, 411

**Dairy products,** *see also individual products*
  lipolysis, pre-, post-manufacture, flavour impairment, 237
**Diet,** grass silage, oil enriched, milk-yield, -composition, milk fat composition, 277
**Disease,** *see* **Mastitis**
**Drought,** effect on milk quality, camel, 159

**Enzymes,** *see individual names*

**Fat(s),** non-milk, detection, quantification, mixtures milk and non-milk fats, 295
**Feeding,** restricted, with/without protected rape seed oil, lipolysis, milk, 287
**Flavour,** ghee, effect of lactic acid bacteria, 411
  milk, dairy products, effect of lipolysis, 237

**Friesian cattle,** milk, casein, composition, 71

**Ghee,** quality, effect of lactic acid bacteria, 411

**Heat stability,** *see* **Coagulation,** milk proteins, heated
**Heat treatment,** β-lactoglobulin, casein micelles, association, 313
**Hormones,** milk (review), 427
**1α-Hydroxycholecalciferol,** injected, parturient cows, Ca, Mg, inorganic phosphate, blood plasma, 177

**Kid,** rennet, preparation, properties, 221

**Lactic acid bacteria,** ripening, cream, quality, ghee, 411
**Lactic streptococci,** modification/restriction systems, phage-typing, 403
  phages, heat resistance, 131
**β-Lactoglobulin,** heat-induced association, casein micelles, 313
**Lamb(s),** rennet, preparation, properties, 221
**Lipase,** milk, activation by serum proteins, 61
**Lipolysis,** milk, dairy products, flavour impairment, 237
  lipoprotein lipase, 61
  restricted feeding, with/without protected rape seed oil, 287
**Lymphocytes,** mammary secretion, dry-period, 305
**Lysinoalanine,** formation from caseins, 193

**Mammary gland,** *see also* **Udder**
  dry-period secretion, lymphocytes, 305
**Mastitis,** diagnosis, somatic cell volume distribution, 167
**Milk,** cell count, casein distribution, cheese-making parameters, 393
  cell types, electron microscopy, 39
  coagulase-negative staphylococci, identification, 155
  coagulation, *see* **Coagulation**
  concentration, rennet coagulation time, 231
  dialysate, stability, factors, 337
  lipolysis, flavour impairment, 237
  restricted feeding, with/without protected rape seed oil, 287
  non-milk fats, mixtures, detection, quantification, non-milk fat, 295
**Milk composition,** adenosine 5′-triphosphate, 91
  Ca, Mg, analysis, pH-stat, 417
  chloroform introduced into rumen, goats, 51
  feeding grass silage, oil enriched, 277
  hormones (review), 427
**Milk fat,** breakdown, *see* **Lipolysis**
  composition, properties, feeding grass silage, oil enriched, 277
**Milk proteins,** concentration, enzymic gelling, 103
  content, composition, creamery milks, S.W. Scotland, 83
  heat stability, *see* **Coagulation,** milk proteins, heated

**Milk serum,** proteins, lipolysis, milk, 61
**Milk yield,** feeding grass silage, oil enriched, 277
goats, chloroform introduced into rumen, 51
**Milking machine,** teatcup liner, deflector shields, udder infection, 1

**Pepsin,** gelling, effect of milk protein concentration, 103
**Pregnancy,** 1α-hydroxycholecalciferol injected, constituents, plasma, 177
**Proteins,** *see* **Milk proteins**

**Rat(s),** milk, caseins, 97
**Rennets,** coagulation, casein micelles, effect of structure of additives, 359
time, effect of milk concentration, 231
hydrolysis, κ-casein, 351
lamb, kid, preparation, properties, 221
**Rennin,** buffalo β-casein, action on, 421
gelling, effect of milk protein concentration, 103

**Scotland,** S.W., milk, protein-content, -composition, 83
**Skim-milk,** coagulation, κ-casein, hydrolysis, rennet, 351
heat stability, 199
concentrated by ultrafiltration, 327
**Soy extract,** zabadi, enrichment, 151
**Staphylococci,** coagulase-negative, teats, milk samples, 155
**Starters,** cheese, single-strain, 141
**Storage,** milk, casein distribution, cheese-making parameters, 371, 383

**Teat,** coagulase-negative staphylococci, identification, 155
disinfection, pre-, post-milking, 253
iodine disinfectant dips, 19, 27, 33
motility, lactating cows, 259

**Udder,** *see also* **Mammary gland**
disinfection, pre-, post-milking, 253
infection, dry period, 11
shields, teatcup liner, 1

**Whey,** Ca, Mg, analysis, pH-stat, 417

**Zabadi,** enrichment, soy extract, 151

# Contents

No. 1 (February 1980)

PAGE

Effect of deflector shields fitted in the milking machine teatcup liner on bovine udder disease. T. K. Griffin, G. E. Mein, D. R. Westgarth, F. K. Neave, W. H. Thompson and P. D. Maguire . . . . . 1

Susceptibility of the bovine udder to bacterial infection in the dry period. C. L. Cousins, T. M. Higgs, E. R. Jackson, F. K. Neave and F. H. Dodd. . . . . 11

Post milking iodine teat skin disinfectants. 1. Bactericidal efficacy. R. F. Sheldrake, R. J. T. Hoare and J. E. Hutchinson . . . . . 19

Post milking iodine teat skin disinfectants. 2. New intramammary infection rates. R. F. Sheldrake and R. J. T. Hoare . . . . . 27

Post milking iodine teat skin disinfectants. 3. Residues. R. F. Sheldrake, R. J. T. Hoare, S. C. Chen and J. McPhillips. . . . . 33

Identification, properties, and differential counts of cell populations using electron microscopy of dry cow secretions, colostrum and milk from normal cows. C. S. Lee, F. B. P. Wooding and P. Kemp . . . . 39

The effect of chloroform introduced into the rumen of the lactating goat on the yield and composition of the milk. S. Basmaeil and J. L. Clapperton . . . . . 51

Activation of milk lipase by serum proteins: possible role in the occurrence of lipolysis in raw bovine milk. R. A. Clegg . . . . . 61

Casein compositional studies. I. The composition of casein from Friesian herd milks. J. G. Barry and W. J. Donnelly . . . . . 71

The content and composition of protein in creamery milks in south-west Scotland. D. T. Davies and A. J. R. Law . . . . . 83

Levels and location of adenosine 5′-triphosphate in bovine milk. T. Richardson, T. C. A. McGann and R. D. Kearney. . . . . 91

Isolation and characterization of the principal caseins in rat milk. J.-P. Pelissier, A. Yahia, J.-M. Chobert and B. Ribadeau Dumas . . 97

Influence of milk protein concentration on the gelling activity of chymosin and bovine pepsin. P. Garnot and C. Corre . . . . . 103

Binding of calcium ions to bovine $\kappa_{a1}$-casein and precipitability of the protein–calcium iron complexes. D. G. Dalgleish and T. G. Parker 113

Hydrophobic surface areas and net charges of $\alpha_{s1}$-, $\kappa$-casein and $\alpha_{s1}$-casein: $\kappa$-casein complex. S. Dosako, S. Kaminogawa, S. Taneya and K. Yamauchi . . . . . 123

Resistance of 17 mesophilic lactic *Streptococcus* bacteriophages to pasteurization and spray drying. M. C. Chopin . . . . . 131

PAGE

Properties of single-strain cheese starter bacteria grown in diffusion culture. R. J. W. Osborne and J. V. Brown . . . . . 141

Enrichment of zabadi with soy extract. S. A. Abou-Donia, M. A. El-Soda and R. Mashaly . . . . . 151

Prevalence of different species of coagulase-negative staphylococci on teats and in milk samples from dairy cows. L. A. Devriese and H. DeKeyser . . . . . 155

No. 2 (June 1980)

Effect of drought condition on the quality of camel milk. R. Yagil and Z. Etzion . . . . . 159

Analysis of somatic cell volume distribution as an aid to the diagnosis of mastitis. R. J. T. Hoare, R. F. Sheldrake, P. J. Nicholls, G. D. McGregor and V. E. Woodhouse . . . . . 167

The effect of 1$\alpha$-hydroxycholecalciferol on the concentrations of calcium, magnesium and inorganic phosphate in the plasma of parturient cows. F. Wittwer and E. J. H. Ford 177

Localization of glycosylated $\kappa$-casein in bovine casein micelles by lectin-labelled gold granules. M. Horisberger and M. Vonlanthen . . . . . 185

Formation of lysinoalanine from individual bovine caseins. W. Manson and T. Carolan . . . . . 193

Heat stability of milk. D. F. Darling . . . . . 199

Effect of selected amides on heat-induced changes in milk. P. F. Fox, B. M. Nash, T. J. Horan, J. O'Brien and P. A. Morrissey . . . 211

Preparation and properties of rennets from lambs' and kids' abomasa. E. Anifantakis and M. L. Green . . . . . 221

Effect of milk concentration on the rennet coagulation time. D. G. Dalgleish. . . . . 231

Review of the progress of Dairy Science: Flavour impairment from pre- and post-manufacture lipolysis in milk and dairy products. W. K. Downey 237

No. 3 (October 1980)

Effect of disinfectant udder wash and a post-milking teat dip on the bacterial population of the teat end and on the rate of new intramammary infection R. F. Sheldrake and R. J. T. Hoare . . . . . 253

Studies on the motility of smooth muscles of the teats in lactating cows. J. Bernabé and G. Peeters . . . . . 259

Effect of oil-enriched diets on the milk yield and composition, and on the composition and physical properties of the milk fat, of dairy cows receiving a basal ration of grass silage. W. Banks, J. L. Clapperton and M. E. Kelly . . . . . 277

PAGE

Effect on milk lipolysis of restricted feeding with and without supplementation with rape seed oil. H. N. Astrup, L. Baevre, L. Vik-Mo and A. Ekern 287

Detection and quantification of non-milk fat in mixtures of milk and non-milk fats. R. E. Timms . . . . . 295

Characterization and response to mitogens of mammary lymphocytes from the bovine dry-period secretion. C. Concha, O. Holmberg and B. Morein 305

Heat-induced association of $\beta$-lactoglobulin and casein micelles. P. Smits and J. H. Van Brouwershaven . . . . . 313

Effect of concentration by ultrafiltration on the heat stability of skim-milk. A. W. M. Sweetsur and D. D. Muir. . . . . 327

Factors influencing the stability of milk dialysate. T. G. Parker and D. S. Horne . . . . . 337

Light scattering investigation of the stability of bovine casein micelles to dilution. T. G. Parker and D. S. Horne . . . . . 343

Determination of the proportion of $\kappa$-casein hydrolysed by rennet on coagulation of skim-milk. B. Chaplin and M. L. Green . . . . . 351

The effect of the chemical structure of additives on the coagulation of casein micelle suspensions by rennet. R. J. Marshall and M. L. Green 359

Influence of storage of milk on casein distribution between the micellar and soluble phases and its relationship to cheese-making parameters. A. E. Ali, A. T. Andrews and G. C. Cheeseman . . . . . 371

Factors influencing casein distribution in cold-stored milk and their effects on cheese-making parameters. A. E. Ali, A. T. Andrews and G. C. Cheeseman . . . . . 383

Influence of elevated somatic cell count on casein distribution and cheese-making. A. E. Ali, A. T. Andrews and G. C. Cheeseman. . . . 393

Multiple modification/restriction system in lactic streptococci and their significance in defining a phage-typing systems. J. P. Boussemaer, P. P. Schrauwen, J. L. Sourrouille and P. Guy . . . . . 401

Effect of ripening cream with selected lactic acid bacteria on the quality of ghee. A. M. Joseph and S. R. Appachar . . . . . 411

Use of a pH-stat to indicate the end-point in titration of calcium plus magnesium in milk and whey. F. Di Gregorio and R. Sisto . . . 417

Specific action of milk-clotting enzymes on water buffalo caseins. I. Effect of chymosin on $\beta$-casein. F. Addeo, J.-P. Pelissier and L. Chianese 421

Review of the progress of Dairy Science: Hormones in milk: their physiological significance and value as diagnostic aids. G. S. Pope and J. K. Swinburne . . . . . 427

Erratum . . . . . 451
